

03. Technical Specifications

03.01 WOOD FLOORS ARE MANUFACTURED FROM NATURAL TIMBER

TIMBER being the most extensively used building material on earth is a **RENEWABLE RESOURCE** that offers you the ability to select from a very broad range of **SPECIES**, which offer you an extraordinary array of **COLOUR, GRAIN, TEXTURE** and other qualities which you may choose, when selecting your choice of **WOOD FLOOR** and **COATING SYSTEM**.

A WELL-DESIGNED, PERMANENT WOOD FLOOR SYSTEM IS INTENDED TO LAST THE LIFE OF THE BUILDING.

➤ **SPECIALIST ADVICE**

When selecting your choice of **TIMBER** and **COATING** seek the advice of a **WOOD FLOOR SPECIALIST**.

Carpet and Vinyl shops may not be as experienced in providing expert, professional advice on your choice of **TIMBER SPECIE**, the **BEST METHOD of INSTALLATION** and the best choice in selection of a **COATING SYSTEM**, to provide you with the best performance from your wood floor **SYSTEM**.

For these reasons, you are strongly advised to deal only with a **SPECIALIST WOOD FLOOR CONTRACTOR**, who is **LICENCED** to carry out the works. Selection of a Contractor who is a **MEMBER of the National Wood Flooring Association of Australia** will provide you with a Contractor who is bound by a strict **CODE of ETHICS** and [CODE of CONDUCT](#), which demands strict conformity with industry standards.
